PROFESSIONAL SUMMARY

Frontend & React Native Developer with 3+ years of experience building and shipping production web and mobile applications. Product-minded developer experienced with React.js, Next.js, React Native, TypeScript, Firebase, REST APIs, realtime data, performance optimization, and AI-powered features using OpenAI, Claude, and MCP. Contributed to a cross-platform productivity platform used by 10,000+ active users and currently building client-facing products independently.

PROFESSIONAL EXPERIENCE

Product-Minded & AI-Driven Frontend / Mobile App Developer | Freelance · Remote Aug 2026 – Present

- Building client-facing web and mobile products independently, translating business requirements into production-ready interfaces, application flows, and maintainable frontend architecture.
- Working across UI implementation, APIs, Firebase, performance, and practical AI-powered features while owning development from requirements through delivery.
- Shivansh Jewellery**: building a Next.js/TypeScript/Firebase e-commerce platform with a custom admin dashboard for product, category, and enquiry management.
- Devli – Har Pooja Ki Samagri**: contributed to a niche devotional-goods shopping experience for doorstep delivery of pooja essentials. Developer listed as Divisha Technologies.

Frontend & Application Developer | DI Solutions · Surat Feb 2024 – Aug 2026

- Developed production web and cross-platform mobile applications using React.js, Next.js, React Native, and TypeScript across multiple product domains.
- Contributed to **ByDesign**, an AI productivity and workspace platform used by 10,000+ active users, including web/mobile features, AI assistant capabilities, and MCP integration.
- Improved core calendar and workspace performance through rendering and data-fetching optimization; delivered features spanning authentication, realtime data, payments, notifications, AI, and location-based experiences.
- Built reusable frontend components, integrated REST APIs/Firebase/FCM, and collaborated with designers, backend developers, and QA to ship features and resolve production issues.

Frontend Developer Intern | DI Solutions · Surat Aug 2023 – Feb 2024

- Built production web interfaces using React.js, Next.js, TypeScript, and Tailwind CSS with responsive layouts and reusable component patterns.
- Integrated frontend functionality with REST APIs and backend services, collaborated with senior developers, designers, and QA, and transitioned to a full-time role after six months.

SELECTED PROJECTS

ByDesign — AI Productivity & Workspace Platform

React.js · React Native · TypeScript · Firebase · MCP

Cross-platform productivity platform unifying tasks, calendars, notes, and documents; contributed to web/mobile features, AI assistant capabilities, MCP integration, realtime sync, and performance.

BBPatrol — Real-Time Traffic Safety Platform

React Native · Android · iOS

Traffic safety app providing real-time speed-camera alerts, police checkpoint reporting, and community incident reporting with location-aware interactions.

Networked AI — Event Networking Platform

React · Ionic · TypeScript · Stripe · Firebase

Event platform covering ticketing, digital business cards, and realtime attendee experiences, with Stripe payments and AI-driven attendee recommendations.

Waves — Devotional & Bible Study Application

React Native · Android · iOS

Cross-platform devotional app delivering daily Bible verses, guided prayers, personalized spiritual content, and AI-assisted scripture exploration.

Shivansh Jewellery — Premium E-Commerce Platform

Next.js · TypeScript · Tailwind CSS · Firebase

Production jewellery commerce platform with customer shopping flows and a custom admin dashboard for product, category, and enquiry management.

Devli — Har Pooja Ki Samagri

Shopping / E-Commerce · Divisha Technologies

Niche devotional-goods e-commerce application focused on doorstep delivery of pooja essentials including camphor, agarbatti, sindoor, and festival/ritual supplies.
